

Blood test:

You want to know how healthy you are...

From a preventive point of view, the CPG blood test gives you insight into your current state of health and allows you to take timely measures (if necessary).

Or do you want to know the cause of your complaints?

CPG has developed a unique blood test that shows your total health condition. In fact, it shows the cause of your current complaints and even allows you to treat them successfully.

Blood doesn't lie...

Two drops of blood from your finger will finally give you insight into the cause of your complaints. If you don't have any complaints, you get insight into your total health condition.

You feel healthy, but are you also healthy?

Even if you have no complaints, it is possible that you are developing them.

Ask yourself the question:

How big is my risk of having a heart and/or brain infarct (TIA)?
Measuring is knowing!

This blood test/finger prick is a laboratory test of 31 parameters, displayed in 12 gradations, which is the deeper cause of your symptoms and even can reflect the consequences of deficits, such as:

Onderzoek	Resultaat	Uitslag	Referentie
SKB Test			
Samenvatting			
Metabolische beoordeeling	1.5		0 - 0.5
Eerste stofwisselingsstoring	0	Negatief	0 - 0.5
Hoofd informatie			
Ontsteking	1.75		0 - 0.5
Allergieën	1.0		0 - 0.5
Adrenale stress	2.0		0 - 0.5
Hormonale storing	0.5		0 - 0.5
Nierenbelasting	0.25		0 - 0.5
Dysbiose	1.0		0 - 0.5
Schimmelpilbeïnvloeding	0	Negatief	0 - 0.5
Doomnappellen	0.5		0 - 0.5
Biogranula	1.0		0 - 0.5
Erytrocyten verbleking	0	Negatief	0 - 0.5
Erytrocyten vormverlies	1.5		0 - 0.5
Zenuwzwaakte	0	Negatief	0 - 0.5
Leverbelasting	2.5		0 - 0.5
Bijkomende informatie			
Hypercalcaemie	0	Negatief	0 - 0.5
Allergische/atrietische diathese	0	Negatief	0 - 0.5
Cyste	1.0		0 - 0.5
Dyspeptische storing	0	Negatief	0 - 0.5
Zuurstof verwerking	2		0 - 0.5
Longfunctie verstoring	1		0 - 0.5
Vitamine B12/foliumzuur gebrek	1.75		0 - 0.5
Verminderde Fibrinolyse	2.0		0 - 0.5
Ijzergebrek	1.5		0 - 0.5
Mangaan gebrek	2		0 - 0.5
Selenium gebrek	0	Negatief	0 - 0.5
Koper gebrek	2.5		0 - 0.5
Cobalt gebrek	0	Negatief	0 - 0.5
Zink gebrek	2.5		0 - 0.5
Blokkade katalasen	1.5		0 - 0.5
Blokkade glutathion-peroxidase	0	Negatief	0 - 0.5
SOD blokkade	2.5		0 - 0.5

Inflammation (pain), immune problems, allergies, folic acid/B12 deficiency, hormonal disturbances, copper deficiency, arteriosclerosis, manganese deficiency, arthritis (pain), calcium deficiency, osteoarthritis (pain), selenium deficiency, rheumatism (pain), iron deficiency, kidney problems, magnesium deficiency, cyst formation, free radical pressure, oxygen uptake gastric acid problems, lung problems, liver problems, intestinal problems, fungal load.

What actually is the deeper cause of your symptoms,

for which you have to take medication and therefore want to know the 'cause'. CPG has developed a specific blood test, for which only 2 drops of blood are needed, which is an ideal way to find out the 'deeper cause'.

How to...

Regular doctors 'look' through special microscopes, where abnormalities are detected in the blood image, so that the cause of your symptoms becomes clear,

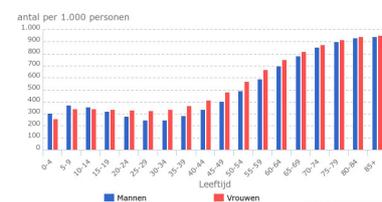

but there's more...

The blood test is even pre-clinical, which means that, before regular medicine can measure it, CPG has already seen it coming or complaints that may still be coming (preventive approach).

The cause is almost always a disturbance of the 6 Health Systems, i.e.

- 1) Acidification (disturbed acidity of the body)
- 2) Gut dysbiosis (disturbed intestinal flora)
- 3) Fatty oxygen metabolism (ratio error between Omega-6 and Omega-3)
- 4) Sugar metabolism (insulin disturbance)
- 5) Oxygen uptake (less energy)
- 6) Free Radicals pressure (oxidative stress)

Center for Preventive Medicine:

CPG uses an ultra modern laboratory, where regular physicians perform the assessment of the blood test with microscopes. This laboratory is located in Kamperland.

John Verhiel:

Orthomolecular therapist and specialist in finding the cause of your complaints through blood tests. Has received his training at the S.a.g.h.o., the Social Academy of Medicine, homeopathy and orthomolecular nutrition, as well as anatomy, physiology and pathology. The training in physical examination and diagnostics successfully completed.

Daphne van Loo:

John works together with Daphne van Loo. Daphne has her own CPG at home and also does blood tests and performs glucose tolerance tests.

CPG finds the cause of:

Skin complaints;

Skin inflammation, contact eczemas, congenital eczemas and psoriasis.

Lung problems and allergies;

Asthma, bronchitis, shortness of breath, cardiac asthma, hay fever, pollen allergies, food allergies, animal allergies and house dust/mite allergies.

Inflammation complaints;

Forehead and jaw cavities, rheumatism, arthritis, ulcerative colitis and Crohn's morbus.

Sugar metabolic disorders;

Hypoglycemia (dips after meals, or daytime dips with sweet desires), Pre-diabetes, Syndrome-X (cause of obesity), depression and burnout.

Other complaints;

Cardiac arrhythmias, fibromyalgia, varicose veins, oedema hands/feet, haemorrhoids, stomach problems, acid burns, liver problems, blood vessel stenosis, chronic fatigue (CFS/ME), and nerve pathway degenerative diseases (MS(Multiple Sclerosis)/PnP(PolyNeuroPathy).

and beyond;

Relief investigation:

For fungi/candida and parasites.

Vaginal flora research:

For fungi (with frequent itching) (self-test)

Preventive use, you have no specific complaints:

After taking the blood test, you will receive the test result digitally in PDF after about 5 working days. After you have read it carefully, you know how healthy you are and where possible points of attention lie or the deeper problems. The true cause of your complaints has become clear. The results are written in clear and simple language.

Use the study Curative, you do have specific complaints:

You have complaints and would like an explanation of the cause by John Verhiel. (Only in the CPG practice in Kerkrade). You then make a follow-up appointment to make a Personal Therapy Plan. During this follow-up appointment the results of the digital questionnaires will be linked to the blood results.

Personal therapy plan:

Together with therapist John Verhiel a therapy plan will be made to help you solve your complaints as soon as possible. If necessary, temporary use can be made of food supplements to supplement any shortages. After that, the nutritional advice will make sure that your health stays on a sustainable level.

Costs:

The blood test costs are: **€ 55,00** and are invoiced separately by the lab.

Blood test 1: (also at Daphne's CPG)

The consultation, differentiation and development costs + **12xA4** report, amounts to: **€ 60,00***

Please note: This last consultation is only valid for those who have completed and sent **all 6 questionnaires of Dokter Doterra** and want this blood test as a result.

Blood test 2: (Not at Daphne's CPG)

The consultation, differentiation and development costs + **18xA4 report**, amounts to: **€ 120,00***. In this test also **cholesterol + blood sugar + blood pressure + urine at 10 points + weight** (incl. Fat percentage, body mass index, moisture content, muscle mass and bone density) + **blood vessel stiffness** and **blood vessel clogging measured**.

*Please pay in cash in practice. There is no possibility to PIN.

Make an appointment:

This can be done via: **+31-6-86468660** (John Verhiel) or **+31-6-28888698** (Daphne van Loo)

Make sure you are present at the practice at least 15 minutes before the appointment. You do not have to be sober.
The whole test takes about 20 minutes.

Practice Impression CPG-Kerkrade: (Drievogelstraat 39)
